EMPOWERING SUSTAINABLE SOLUTIONS
FOR A GREENER TOMORROW.

ABOUT US

In today's environmentally conscious world, industries are under increasing pressure to minimize their environmental impact while maintaining operational efficiency. That's where V- Envirosol comes into play. We are a team of dedicated experts who specialize in providing comprehensive environmental solutions tailored to the unique needs of industrial clients.

Versatile Group of Companies has three companies including the flagship company Versatile EngiSafe Private Limited, Gravity Risk Services Private Limited and Versatile Resources.

Headquartered in the Industrial capital of India Bharuch, Western India, Versatile group companies, have more than 250 persons as staff covering the entire gamut of specializations in the Environment, Health, Safety and Fire, across Gujrat and the rest of India.

Versatile Group of Companies is certified under ISO 9001. Our laboratory is recognized by certified under OHSAS 18001. The laboratory is also accredited by NABL under ISO 17025. We provide sampling and testing services for water and wastewater, hazardous and solid wastes, ambient air and stack emissions, noise monitoring, workplace monitoring, Industrial Hygiene sample and soil testing.

VISION

At **V-Envirosol**, we envision a world where the delicate balance of nature is respected and preserved for generations to come. Our commitment is to lead the way in creating sustainable solutions that harmonize human progress with the health and vitality of our planet. Through innovation, advocacy, and responsible business practices, we strive to be a driving force in the global movement towards environmental stewardship. Our vision is to leave a legacy of a cleaner, greener, and more sustainable world for all living beings, ensuring a brighter future where nature thrives alongside human prosperity

V-Envirosol is committed to being a beacon of hope and action for a sustainable future. Our vision drives us to explore new horizons, seek innovative solutions, and work collaboratively with others who share our passion for environmental well-being. We believe that by adhering to these principles, we can leave a legacy of positive change for generations to

Our unwavering vision is encapsulated in three core pillars

Environmental Harmony | Innovation and Sustainability | Global Collaboration

CORE VALUES

Values and ethical business practices encompass all stages of our business operations. Being our core competencies, we always stand by the value systems which include -

Integrity :

Trusting and respectful relationship.

Commitment :

Deliver on promise.

Innovation :

Embrace change and continually seek new ways to improve.

Excellence :

Committed to highest quality and safety standards.

Independence :

Individualized plans that compliment your needs.

OUR SERVICES

01 Consulting Services

EIA / SIA Consultant :

Consultancy services for screening, scoping, Collection of baseline data, Impact prediction, Mitigation measures & EIA report, Public hearing, Decision making, Monitoring & implementation of environmental management plan, Assessment of Alternatives, Delineation of Mitigation Measures Environmental Impact Assessment Report & Risk assessment.

Air, water, noise, solid / hazardous waste modelling and risk assessment :

Model for impact prediction & mitigation for environmental risk with control measures identification by the latest software.

Environmental Management Plan :

Guide to developing documents to measure and achieve compliance with the environmental protection and mitigation requirements of a project, which are typically requirements for project permits / approvals.

Study of Environmental, Health and Safety Management Systems (EHSMs) :

Study for determining the applicable impacts and risks. Mitigating those risks. Defining objectives and targets aided by a management program to achieve these targets and allocating critical resources such as finance, technology, people, etc. to meet those objectives.

Environmental Audits :

GPCB Approved Schedule II Environmental Auditor. “Environmental Audit” is an environmental management tool comprising a systematic, periodic & objective evaluation of how well the Environmental Organization, Management system and Equipment are performing.

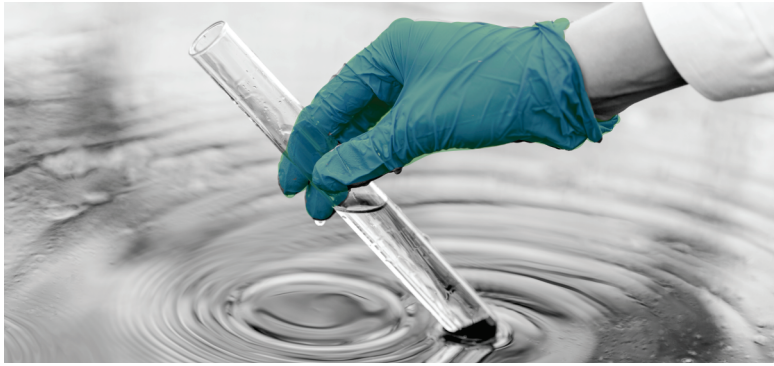

Environmental site assessments and transactional advice :

Helping carry out ESA / EDD for clients to identify potential financial and commercial implications of environmental, health & safety and social (EHS&S / EHS Compliance) risks and liabilities associated with the transaction.

Enviro-Legal Permissions CGWA, CTE/NOC, CTO/CCA, CRZ :

Providing services related to No Objection Certificate and Consolidated consent and authorization from GPCB, CRZ and CGWA including document support, site readiness and technical meetings / visits with officials on site and query support.

02 Engineering Services

Water/ Wastewater Management :

Design, consulting, project management and execution for achieving ZLD with Automated PLC based Systems for Sewage Treatment Plants, Effluent Treatment Plants,

Aeration systems using MBR, SBR, MBBR, FAB, Conventional ASP using Surface Aerators/diffusers/ Trickling Filters

Tertiary treatments using UF, RO and MEE

Water treatment plants

Conveyance network for water/wastewater

Rain Water Harvesting and Recharging System

Biogas Plant for canteens and industrial plants

Solid and Hazardous Waste Management :

Consultancy for Solid & Hazardous Waste Management

Waste Management by prevention, minimization, 3R Technique, co-processing & safe disposal approach

Waste Collection / Transportation / Disposal Services

Air pollution control management :

Baseline assessment of APCM

Designing of APCM / Refurbishment of APCM

CEMS installation / supply / services

03 Environmental, Social and Governance Management Systems (ESGMS)

- Development of Environmental, Social and Governance Policy
- Development of ESGMS with process, procedures and tools with relevant formats
- Implementation Support for ESGMS including training and capacity building
- ESGMS Implementation Audit and Improvement
- Monitoring and compliance of the ESGMS
- Support in supplier, vendor, client (National / International) audit / visit / approval process
- Responsibility and Sustainability Report (BRSR) preparation, documentation, system preparation / implementation
- Sustainability Data Analytics, Creation of Scorecards and Dashboards
- Sustainability Awareness and Capacity Building

04 Community / Employee consultation & capacity building

- Community support and inclusion management establishment and implementation
- Skill, knowledge and process strategy designing and implementation
- Expectation setting among all stakeholders / level upliftment
- Employee accountability matrix assessment / finalisation / implementation
- Environmental / sustainability training / workshop

05 Other Services

- NABL Accreditation for the laboratory with dedicated hi-tech instruments.
- State of the art facilities including experienced professionals to take care of 90+ parameters of air, water, wastewater and solids as per State PCB requirements.
- GPCB Recognized Environmental Auditors.
- Air, Water (effluent, sewage, surface water, groundwater, drinking water), Solid, hazardous waste and Soil Sample collection and Analysis, Noise Monitoring.
- Treatability Studies help to evaluate the most viable flow of treatments required for treatment of effluent based on the footprint availability, flow, endpoint discharge, volume, skill set of operating staff etc.
- Manpower Supply for Environmental Services : Professional and experienced Manpower supply for various environmental infrastructures and help you to show the forward path analysis for efficient treatment, optimization of existing processes, waste minimization etc.
- Operation and Maintenance of Various Treatment Plants, RO, MEE, ETP, STP, CETP (including treatability studies and improvement in existing systems).
- EMS system design / documentation / awareness / implementation / monitoring / improvement services
LDAR Survey & Reports.
- Services related to Identification of Components, Define Potential Leaks, Monitor Components and Repair Components, Data management and analysis and Continuous Improvement.
- Assistance of Implementation of EMS concerning ISO 14001:2015.
- Support in Environmental Policy, Planning, Implementation, Checking and Corrective Action, Management Review process for ISO 14001:2015.

WHY CHOOSE US

- Experienced Professionals** : Our team consists of highly qualified environmental experts with years of industry experience.
- Tailored Solutions** : We understand that each industry is unique & we customize our services to fit your specific needs.
- Regulatory Expertise** : Stay updated & compliant with the ever-evolving environmental regulations, avoiding costly fines & penalties.
- Sustainable Practices** : We promote sustainable solutions that benefit both the environment & your bottom line.
- Cost Savings** : By reducing waste and improving resource efficiency, our services often result in significant cost savings.
- Reputation Management** : A commitment to environmentally responsible practices enhances your company's image & brand.

Conclusion : At Versatile Envirosol, we are committed to helping industrial clients navigate the complex world of environmental regulations and sustainability. Our Industrial Environmental Consultancy Services are designed to protect the environment, ensure compliance and improve your bottom line. Let us be your partner in creating a greener, more sustainable future for your business and the planet.
